RAL Snow Code

1. Stay in control at all times:

- Ride to the conditions.
- Control your speed.
- Don't lose what you use, your equipment or rubbish.

2. Respect gets respect:

- Give way to riders below.
- Share the slopes and give each other space.
- Obey ski area signage – it's for your safety.

Be aware of the unique Alpine risks

- **Avalanche risk:** RAL safety services will manage this risk.
- **Volcanic risk:** Volcanic mudflow (lahar) travel in valleys primarily. Refer to Hazard Map below.
- **Alpine Weather:** All on site must be suitably equipped for alpine conditions at all times
- **UV sun exposure is intense at altitude:** Sunscreen and eye protection: goggles or glasses.
- **Icy conditions underfoot and on structures:** All must have appropriate footwear and other personal protection such as helmets when appropriate.

HAZARDS

LAHARS PATHS: Eruptions generate lahars (volcanic mudflows) that can pass through valleys in the ski area.

A lahar in 1995 narrowly missed the bottom of the Far West T Bar.

HAZARD ZONE: During an eruption, flying rocks & fast moving clouds of steam and hot ash may occur.

IMPACTS: Serious injury and can be lethal.

Anywhere on this map is at risk from ashfall – this can obscure vision and make it hard to breathe.

IF YOU ARE:

IN A VALLEY

> Move out of the valley to a ridge top.

IN THE HAZARD ZONE

> Move down the mountain following ridges.

! If you see flying rocks, or a steam & ash cloud coming towards you, take shelter behind a bank or ridge and cover your head with your pack.

IN A BUILDING/CAR PARK/HIGH GROUND

> Stay put and await instructions.

LAHAR WARNING SYSTEM

An Eruption Detection System (EDS) is operating in the ski area. The system will set off sirens and loudspeaker messages.

Disclaimer

This map shows areas most at risk in a sudden eruption with little or no warning. Larger eruptions can and do occur. Volcanic activity and other unforeseen factors may alter features on this map, so safe and hazardous areas may change without notice.
